CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 7 sections 1308-3, 1308-4, 1463, 1985, 6932, 6962.

SUBCHAPTER I—DEFINITIONS

§ 3801. Definitions

(a) For purposes of subchapters I through V of this chapter:

(1) The term "agricultural commodity" means—

(A) any agricultural commodity planted and produced in a State by annual tilling of the soil, including tilling by one-trip planters; or

(B) sugarcane planted and produced in a State.

(2) The term "conservation district" means any district or unit of State or local government formed under State or territorial law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of government may be referred to as a "conservation district", "soil conservation district", "soil and water conservation district", "resource conservation district", "natural resource district", "land conservation committee", or a similar name.

(3) The term "cost sharing payment" means a payment made by the Secretary to an owner or operator of a farm or ranch containing highly erodible cropland under the provisions of section 3834(b) of this title.

(4)(A) The term "converted wetland" means wetland that has been drained, dredged, filled,

leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) for the purpose or to have the effect of making the production of an agricultural commodity possible if—

(i) such production would not have been possible but for such action; and

(ii) before such action—

(I) such land was wetland; and

(II) such land was neither highly erodible land nor highly erodible cropland.

(B) Wetland shall not be considered converted wetland if production of an agricultural commodity on such land during a crop year—

(i) is possible as a result of a natural condition, such as drought; and

(ii) is not assisted by an action of the producer that destroys natural wetland characteristics.

(5) The term "field" means such term as is defined in section 718.2(b)(9) of title 7 of the Code of Federal Regulations (as of January 1, 1985), except that any highly erodible land on which an agricultural commodity is produced after December 23, 1985, and that is not exempt under section 3812 of this title shall be considered as part of the field in which such land was included on December 23, 1985, unless the Secretary permits modification of the boundaries of the field to carry out subchapters I through V of this chapter.

(6) The term "highly erodible cropland" means highly erodible land that is in cropland use, as determined by the Secretary.

(7)(A) The term "highly erodible land" means land—

(i) that is classified by the Soil Conservation Service as class IV, VI, VII, or VIII land under the land capability classification system in effect on December 23, 1985; or

(ii) that has, or that if used to produce an agricultural commodity, would have an excessive average annual rate of erosion in relation to the soil loss tolerance level, as established by the Secretary, and as determined by the Secretary through application of factors from the universal soil loss equation and the wind erosion equation, including factors for climate, soil erodibility, and field slope.

(B) For purposes of this paragraph, the land capability class or rate of erosion for a field shall be that determined by the Secretary to be the predominant class or rate of erosion under regulations issued by the Secretary.

(8) The term "hydric soil" means soil that, in its undrained condition, is saturated, flooded, or ponded long enough during a growing season to develop an anaerobic condition that supports the growth and regeneration of hydrophytic vegetation.

(9) The term "hydrophytic vegetation" means a plant growing in—

(A) water; or

(B) a substrate that is at least periodically deficient in oxygen during a growing season as a result of excessive water content.

(10) The term "in-kind commodities" means commodities that are normally produced on
